

NAVARRO COUNTY PACE FOR THE BUSINESS COMMUNITY

WHAT IS THE PACE PROGRAM?

Property Assessed Clean Energy (PACE) is a proven financial tool that incentivizes Texas' property owners to upgrade facility infrastructure with little or no capital outlay. Approved by state legislation and established by Navarro County, PACE enables owners to lower their operating costs and use the savings to pay for eligible water conservation, energy efficiency, resiliency, and distributed generation projects. Owners gain access to affordable, long-term, private financing that is not available through traditional funding avenues.

Owners of eligible commercial, industrial, agricultural, nonprofit, and multifamily facilities can use Navarro County PACE to pay for property improvements including new heating and cooling systems, lighting, solar panels, water pumps, insulation, roofs, windows, and more. This program accelerates upgrade investments in existing facilities, preserving capital and credit lines and empowering owners to retain their available capital for revenue-generating items including employees, technology, products, and growth.

PACE was identified by Scientific American as one of the top 20 "world changing" ideas, because it provides a new source of property-secured financing for property retrofits that does not affect conventional lending sources and does not compete for capital with other investment opportunities.

Navarro County PACE answers the question, "How are we going to pay for it?" It transforms how developers, owners, and contractors look at projects, proving that there is a clear path forward for energy efficiency, distributed generation, and water use reduction measures.

HOW DOES NAVARRO COUNTY PACE WORK?

Navarro County PACE is a simple and effective program that allows owners to see an immediate increase to net operating income and find investing in efficiency a business-savvy proposition. Owners choose a private sector capital provider and voluntarily request that the local government place a senior lien on the property for the total cost of the project. The owner commits to the local government that he/she will pay the PACE assessment installments. Navarro County PACE is not a personal or business loan. It is a voluntary land-secured assessment that is paid off over time. The energy and/or water savings are structured to exceed the cost of the assessment, resulting in projects that are cash flow positive. As the assessment is tied to the property, the repayment obligation transfers to the next owner if the property is sold.

Texas PACE Authority administers the uniform "PACE in a Box" model program on behalf of local governments. This successful model is market-based and flexible, providing the lowest possible administrative cost and highest level of consumer protection, allowing owners to do business with the parties of their choosing.

How It Works

A Building Owner:

If the owner, building, and project all meet PACE requirements:

WHAT ARE THE BENEFITS OF NAVARRO COUNTY PACE?

Property Owner Benefits:

Cash flow positive projects • 100% financing • Automatic transfer upon sale • Long-term financing (up to 20 years or more) • Lower energy and water costs • No personal guarantees • Competitive rates and terms • Owner retains all tax incentives • Increase property value • Preserve capital for core business • Healthier and more comfortable facilities • Reduces environmental impacts

Service Provider Benefits:

Increased local hiring • Accelerated project timelines • New market penetration • Best practices • Technology advancement improvements

Capital Provider Benefits:

Steady and stable process • Fully collateralized • Tax assessment lien position • Improved asset value • Mortgage-holder consent • Enhances customer finance position

WHAT PROPERTY TYPES AND IMPROVEMENTS ARE ELIGIBLE?

Eligible Property Types:

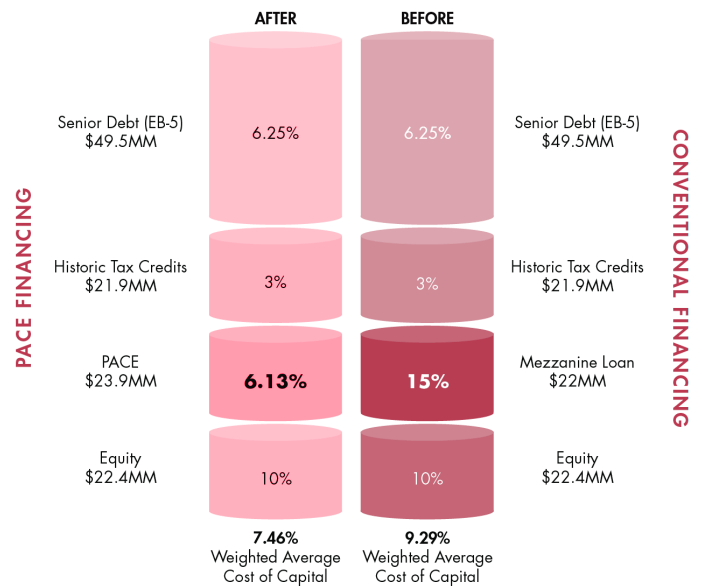

- Commercial
- Industrial/Manufacturing
- Multifamily housing (5+ units)
- Hospitality
- Agricultural
- Nonprofit

Eligible Improvements:

Chillers, boilers, and furnaces • HVAC, BMS, BAS, EMS controls • Lighting • Water heating systems • Energy management systems and controls • Roofing • Windows • Doors • Insulation • Elevator modernization • Pool equipment • Cogeneration or combined heat and power • Heat recovery and steam traps • Solar panels • Wind turbines • Water management systems and controls • Irrigation equipment • Rainwater collection systems • Toilets • Faucets • Greywater systems... and more!

TEXAS EXAMPLE

The City of Dallas' TX-PACE program was utilized to finance \$23.9M in energy & water conservation measures within the redevelopment of the Butler Brothers historic building. TX-PACE enabled the inclusion of these sustainable improvements with significant savings in the cost of capital over the cost of traditional mezzanine financing or equity partner financing in the capital stack of this renovation.

SPOTLIGHT ON NAVARRO COUNTY PACE

RJ Liebe Athletic Lettering Company is the first Navarro County PACE project and the first manufacturing facility to use PACE financing. Liebe's energy conservation measures included high efficiency HVAC and LED lighting with an implementation cost of \$325,000. The project is projected to save 187,177kWh annually.
